9.1700 RCD, Residential Community Design District

.1 Purpose

The RCD district is intended to provide a planning, regulatory, and management framework for the design and integration of small lot residential development. The district is designed to reinforce surrounding neighborhood character, provide appropriate transitions in use and building scale, ensure appropriate allocation and design of open space, and achieve a well-connected street and pedestrian network. The zoning district is appropriate for undeveloped properties and redevelopment sites in areas within Transit Corridors and the Community Vision Map of Envision Oak Point where compatible transitions can be provided from established neighborhoods.

.2 Minimum District Size

No RCD district smaller than 5 acres may be established unless a specific finding is made by the City Council that the establishment of the district is required to implement the Comprehensive Plan or related study.

.3 Permitted Uses

See the residential districts use table in Sec. 14.100 for a complete listing.

.4 Housing-Types Requirement

- A.** The district is limited to a minimum of 10 dwelling units per acre and a maximum of 20 dwelling units per acre. Calculation of residential density is based on the net size of the property, exclusive of public and private streets, street easements, and public usable open space, at the time of development.
- B.** If a housing type is provided, it must account for at least 10% of the total units in the district.
- C.** The required mix of housing types is determined by the number of dwelling units provided within the district as shown below.

Dwelling Units Provided	50 Units or Less	51-100 Units	Over 100 Units
Minimum Housing Types Required	1	2	3
Tier One Units	Minimum 50% of total units	Minimum 50% of total units	Minimum 50% of total units

.7 Residential Transition Areas

In addition to the front, side, and rear yard requirements noted in Sec. 9.1700.5, all buildings must be set back from the district boundary line of the nearest residential zoning district or the lot line of a residential use outside of the RCD district, as follows:

- A.** When an alley is present on the neighboring property: at least two feet for every one foot of building height.
- B.** When an alley is not present on the neighboring property: at least 15 feet plus two feet for every one foot of building height.
- C.** This minimum setback may be reduced to a setback of 20 feet when the nearest residential zoning district allows a maximum height greater than 35 feet.

.8 District Establishment and Administration

- A.** The regulations contained within this zoning district may be supplemented with additional standards and conditions to execute a specific development plan. The boundary of each RCD district must be defined on the Zoning Map and identified with the letters RCD followed by a unique number referencing the supplementary regulations. In considering the establishment of an RCD district, the Planning & Zoning Commission and City Council may amend and supplement the base RCD regulations and related development regulations in the Zoning Ordinance and Subdivision Ordinance to implement individual development plans, with the exception of:
 - i.** Requirement for an adopted development plan;
 - ii.** Requirement for a governance association;
 - iii.** Minimum and maximum residential densities;
 - iv.** Requirement for a mix of housing types.
- B.** An RCD district may not be used to:
 - i.** Require construction of public improvements or the dedication or reservation of land, which are not of primary benefit to development within the district or necessary to mitigate an adverse impact attributable to development within the district, unless compensation is provided as required by law.

- ii. Secure agreements between owners of property within the district with third parties.
- iii. Assign responsibility to the city for enforcement of private deed restrictions or covenants.
- iv. Waive or modify the requirements of ordinances other than the Zoning Ordinance, except as specifically authorized by this ordinance.

 - i. Show the location and type of streets, blocks, parking areas, open space, and residential transition areas;
 - ii. Specify the minimum and maximum number of residential units by housing type; and
 - iii. Enumerate all standards, conditions, and performance and implementation requirements not otherwise contained in the base zoning district requirements.
- B. The development plan must be adopted as part of the ordinance creating the RCD district. Modifications to the development plan must comply with the requirements in Sec. 3.600.

.10 Governance Association

Applications for building permits for development within an RCD district must not be accepted or approved until a suitable property owners' governance association is established. The association must be responsible for maintaining all common property, improvements, and amenities within the district. It must have power sufficient to assess and collect dues and charges as required to perform its responsibilities. It may have additional powers to administer other programs, including but not limited to, security, promotion and marketing and entertainment. A Municipal Management District or Public Improvement District created in conformance with the Texas Local Government Code may be created to satisfy this requirement. A Reciprocal Easement Agreement (REA) allowing shared parking arrangements, public access to sidewalks, and to other amenities must be incorporated in the governance documents, but the REA may be deferred until a plan for common areas and amenities is submitted.

.11 Streets and Sidewalks

- A.** All streets within an RCD district must be dedicated as public streets, or if the city does not accept the dedication of some or all as public streets, the streets that have not been dedicated as public streets must be platted as private streets. All streets are to be open for public use and may not be gated or have restricted access, except as may be permitted for special events. All streets must be located in a private street lot or in public right-of-way. The width of a street lot or right-of-way is determined by the adopted development plan. A private street lot or public right-of-way may vary in width but must accommodate travel lanes, medians, sidewalks, utilities, street furniture and fixtures, and landscaping of public or common ownership. Easements may be required within the street lot for utilities and emergency access.

B. Street Design

An RCD district site must be organized into blocks created by a connected grid of streets. A variety of street types and block sizes may be incorporated to create the grid, including diagonal, off-set, and angled streets. Cul-de-sacs and curvilinear streets are prohibited, except where needed to account for major natural features.

C. Block Size

The maximum block size is three acres, except as required for public parks or school use.

D. Block Length

The maximum block length is 600 feet, with a desired typical block length of 400 feet. The block length is the distance along a street face uninterrupted by an intersecting street, transit right-of-way, and/or public usable open space designated on the development plan, excluding intersections with mews streets.

E. Street Trees

A tree planting strip at least 5 feet in width is required on both sides of major and minor streets between the curb and sidewalk. Trees must be centered in the tree planting strip at the rate of one tree per 40 linear feet of street frontage.

F. Sidewalks

Sidewalks are required on both sides of all major and minor streets. Trees, landscaping, outdoor dining areas, bicycle racks, and street furniture may be placed on or within a sidewalk, but a minimum clearance width equal to the minimum sidewalk width must be maintained. Awnings, canopies, and other detachable fixtures may extend into the private street lot or public right-of-way. All public sidewalks to be maintained by the governance association must be located in a private street lot or public right-of-way.

G. Street Types

All streets within an RCD district must be constructed in accordance with the following general street classifications:

Paseo	Minimum overall width: 28 feet with minimum 40 percent landscaped area with 3 caliper inches of shade trees or 6 caliper inches of ornamental trees per 500 square feet of landscape area with a minimum tree size of 2-inch caliper. No vehicle lanes, except for emergency service access if built to fire lane standards.	Not permitted	Minimum 12-foot wide main sidewalk and minimum 4-foot wide pathways providing access to individual entrances of buildings on adjacent lots

H. Paseo Requirements

- i. All dwelling units abutting a paseo must face the paseo.
- ii. No more than 33 percent of all dwelling units in an RCD development may directly front a paseo or public usable open space.

I. Landscape Edge

Along Type D and above thoroughfares, a 20-foot landscape edge is required. Within the landscape edge, 6 caliper inches of shade trees or 12 caliper inches of ornamental trees must be planted per 500 square feet of landscape edge with a minimum tree size of 2-inch caliper. The number of required trees must be calculated solely on the area of the required landscape edge.

J. Bike Lanes

Bike lanes must have a rideable surface at least 5 feet in width. A solid white lane line, bicycle lane word and/or symbol, and arrow markings that meet the Texas Manual on Uniform Traffic Control Devices requirements must be used to define the bike lane. A minimum 2-foot separation between the bike lane and any parallel vehicle lane is required. On major streets, a physical barrier between the bike lane and any parallel vehicle lane is required and must meet the Federal Highway Administration Separated Bike Lane Planning and Design Guide standards. Where possible, bike lanes must connect to existing or planned trails or bikeways located in or adjacent to the RCD district.

K. Connectivity

Connections must be made to provide direct pedestrian and bicycle access from the RCD district to adjacent sidewalks, trails, parks, transit stops, and other connections where feasible. Pedestrian access must be provided by connection to any sidewalks or walkways on adjacent properties that extend to the boundaries shared with the RCD district. In order to provide efficient pedestrian connections to adjacent properties, the city may require additional sidewalks, walkways, or trails not associated with a street.

L. Curb Bulb Outs

Curb bulb outs are required at all intersections and defined mid-block crossing points on all street types with dedicated on-street parking, except for Type D and above thoroughfares. Curb bulb out areas may not be used to satisfy the required street tree planting strip.

.12 Parking Requirements

- A.** Parking for nonresidential uses must follow NBD standards (Sec. 10.1600.13).
- B.** Garage or off-street parking spaces for all housing types may only be accessed from a mews street.
